adamhickey

Senior Digital Designer

Twenty years of visual ideas brought to life: identities, illustration, sites and interfaces. I started as a graphic designer and front-end developer, spent thirteen years making large enterprise products coherent, and now design and build brand and digital work end to end.

Independent

- **Brand, digital and interactive design**

  2026 – Present

  Say When, a self-initiated coffee brand concept from strategy and logo through packaging, a campaign and a working storefront. Door County Found, an editorial travel brand and guide, and Lucy Learns, an illustrated training app, both in use and built end to end. Faunaform, a screen-print studio in progress.

RBA Inc

- **Lead UX Product Designer**

  2013 – 2026

  Led UX and visual design for large enterprise products and design systems in logistics, manufacturing, healthcare, finance and the public sector, and the Innovators Studio identity for a global innovation network. Built and governed design systems on SAP, Microsoft, Umbraco and Sitecore, and designed and built Connect, the firm's brand foundation and design-system site.

Selected work

Innovators Studio: identity, illustration, badges, templates and a community portal over four fiscal years.

40+ SAP applications on one design system and accessibility standard: a third less time from design to development, production UI defects roughly halved.

A USDA grant portal and **a 450+ truck dispatch cockpit:** complicated information made clear.

Pixel Farm

- **Interactive Designer / Developer**

  2008 – 2013

  Designed and built brand-led sites, campaigns and apps for Lund Boats, Fulton Beer, Hazelden and Learn to Live, in HTML, CSS and jQuery.
