Professional summary

I make complicated products easier to use and new ideas easier to test. Senior product designer with 20 years across visual design, interaction, and enterprise software, for organizations including Cargill, Intel, CBRE, and Toro. Thirteen years leading UX for complex B2B applications and the design systems other teams built from: research with the people doing the work, one standard across 40+ apps, and release checks that held after I left. Hands-on from the first sketch to working prototypes, now built with coding agents, on products that are new or have grown complicated.

Experience

Selected Independent Work — Product design, visual systems, prototyping 2026 – Present

- **Agent Review** — Designed and built, with Claude Code, a React and TypeScript prototype where agents build the screens and a designer decides what ships: written design rules and automated visual and accessibility checks, on simulated runs.
- **The Shortlist** — A service design concept carrying one shopping trip from a phone into a store: a service map joining the journey and the blueprint, and a working prototype on sample data.
- **Door County Found** and **Lucy Learns** — two products in use, designed and built end to end: an editorial travel guide (identity, art direction, a site its editor keeps current) and an illustrated, offline-first dog-training app.

RBA Inc — Lead UX Product Designer 2013 – 2026

- Led UX and visual design for complex B2B web applications and design systems for clients in logistics, manufacturing, healthcare, financial services, and the public sector, including compliance-sensitive work for a federal agency, a regional bank, and healthcare providers.
- Sat with people through their workday and fixed what slowed them: usability testing on real tasks, information architecture, interaction design, and visual hierarchy across large sets of screens, with developers in the room from the first sketch.
- Built and governed design systems across SAP, Microsoft, Umbraco, and Sitecore: tokens, component libraries, contribution rules, and release checkpoints, including one standard for 40+ SAP apps; designed and built Connect, the firm's own design-system site. Led the accessibility (WCAG 2.1 AA), DesignOps, and governance practices.
- Aligned product owners, developers, and analysts on one standard: audits walked through app by app, workshops, and a scorecard each team ran itself; NPS up about 20 points over several SAP releases.

Pixel Farm — Interactive Designer / Developer Oct 2008 – Apr 2013

Designed and built brand-led websites, campaigns and interactive pieces for Lund Boats, Fulton Beer, Hazelden and others, including Lund's boat configurator; shipped two native iOS apps and an iPad app; led rebrands and identity systems. Front ends in HTML, CSS, and jQuery.

LEVEL — Interactive Designer Oct 2006 – Oct 2008

Designed and built websites and interactive pieces in HTML, CSS and Flash, beside writers, creative leads and developers.

ByDesign — Design Intern 2004 – 2006

Selected projects

- Making 40+ SAP applications feel like one product: one visual language, one design system, and one accessibility standard, about a third less time from design to development, and UI defects in production cut roughly in half.
- An identity, illustration and badge system, templates and a community platform for a global corporation's innovation network, over four fiscal years; campaign production time roughly halved.
- Leading product design on a USDA grant platform, one record from application through analysis in place of spreadsheets; data-analysis requests from 45–55 hours to just over 10.
- A real-time, data-dense dispatch app for a 450+ truck fleet; board-clearing time down roughly 30%.

Core capabilities

Enterprise Product Design · Complex B2B Workflows · UX Research & Usability Testing · Design Leadership & Facilitation · Design Systems & Governance · Information Architecture · Interaction Design · Visual Design & Typography · Accessibility (WCAG 2.1 AA) · Service Design · Brand Identity & Illustration · Prototyping in Code · Human–AI Interaction

Tools & platforms

Design: Figma/FigJam (variables, Dev Mode, component libraries) · Adobe Creative Cloud (Illustrator, Photoshop, InDesign) · CSS custom properties (tokens) · ChatGPT & Gemini
Front end, by hand (2005–2013) and with coding agents now: HTML · CSS · JavaScript/jQuery · React · TypeScript · Storybook · Playwright · Vitest & axe · Git/GitHub · Claude Code (skills, plugins, MCP)
Platforms: SAP Fiori · Sitecore · Umbraco · WordPress · Joomla! · WCAG 2.1 AA

Education

Bachelor of Science in Graphic Design, University of Minnesota–Twin Cities (2005)
